Icotera develops and delivers innovative FTTH gateways, routers, access points and software monitoring solutions to leading fiber operators in Europe. We pride ourselves on creating and delivering products with superior design, quality and performance.

Our Icotera headquarters is based in Denmark, while all of our R&D and customer support is located in Poland. Our hardware and software development is done in-house, guaranteeing our customers the exact quality they need. For years we have proven our ability to adapt quickly and effectively to future technologies, working with customers to provide them with the services they require.

Due to dynamic growth and expansion on the European FTTH market, Icotera now offers a unique opportunity at our R&D site in Szczecin. Here you will contribute to an exciting future in an environment where we strive to use latest technologies and trends to develop our products and solutions. Join us now
